2015–2023

9 modern, highly automated elevator complexes commissioned across the network.

BUSINESS LINES

Grain trading

Cereals, oilseeds, pulses and industrial crops — domestic market and direct export.

Elevator services

Storage, cleaning, drying and shipment of crops by road and rail across 14 facilities.

Rail forwarding & transport

Rail freight forwarding and cargo transportation by road and rail.

Crop production

In-house agricultural production; member producers rank among regional leaders.

Flour milling

Production and sale of milling products at the group's own mill sites.

Port infrastructure

Port elevator operations in Rostov-on-Don with direct access to the Azov–Black Sea export corridor.

1,000+

employees across all group divisions

14

regions of operation in Southern & Central Russia

134,000+ ha

farmland operated by the group's producers

13 + 1

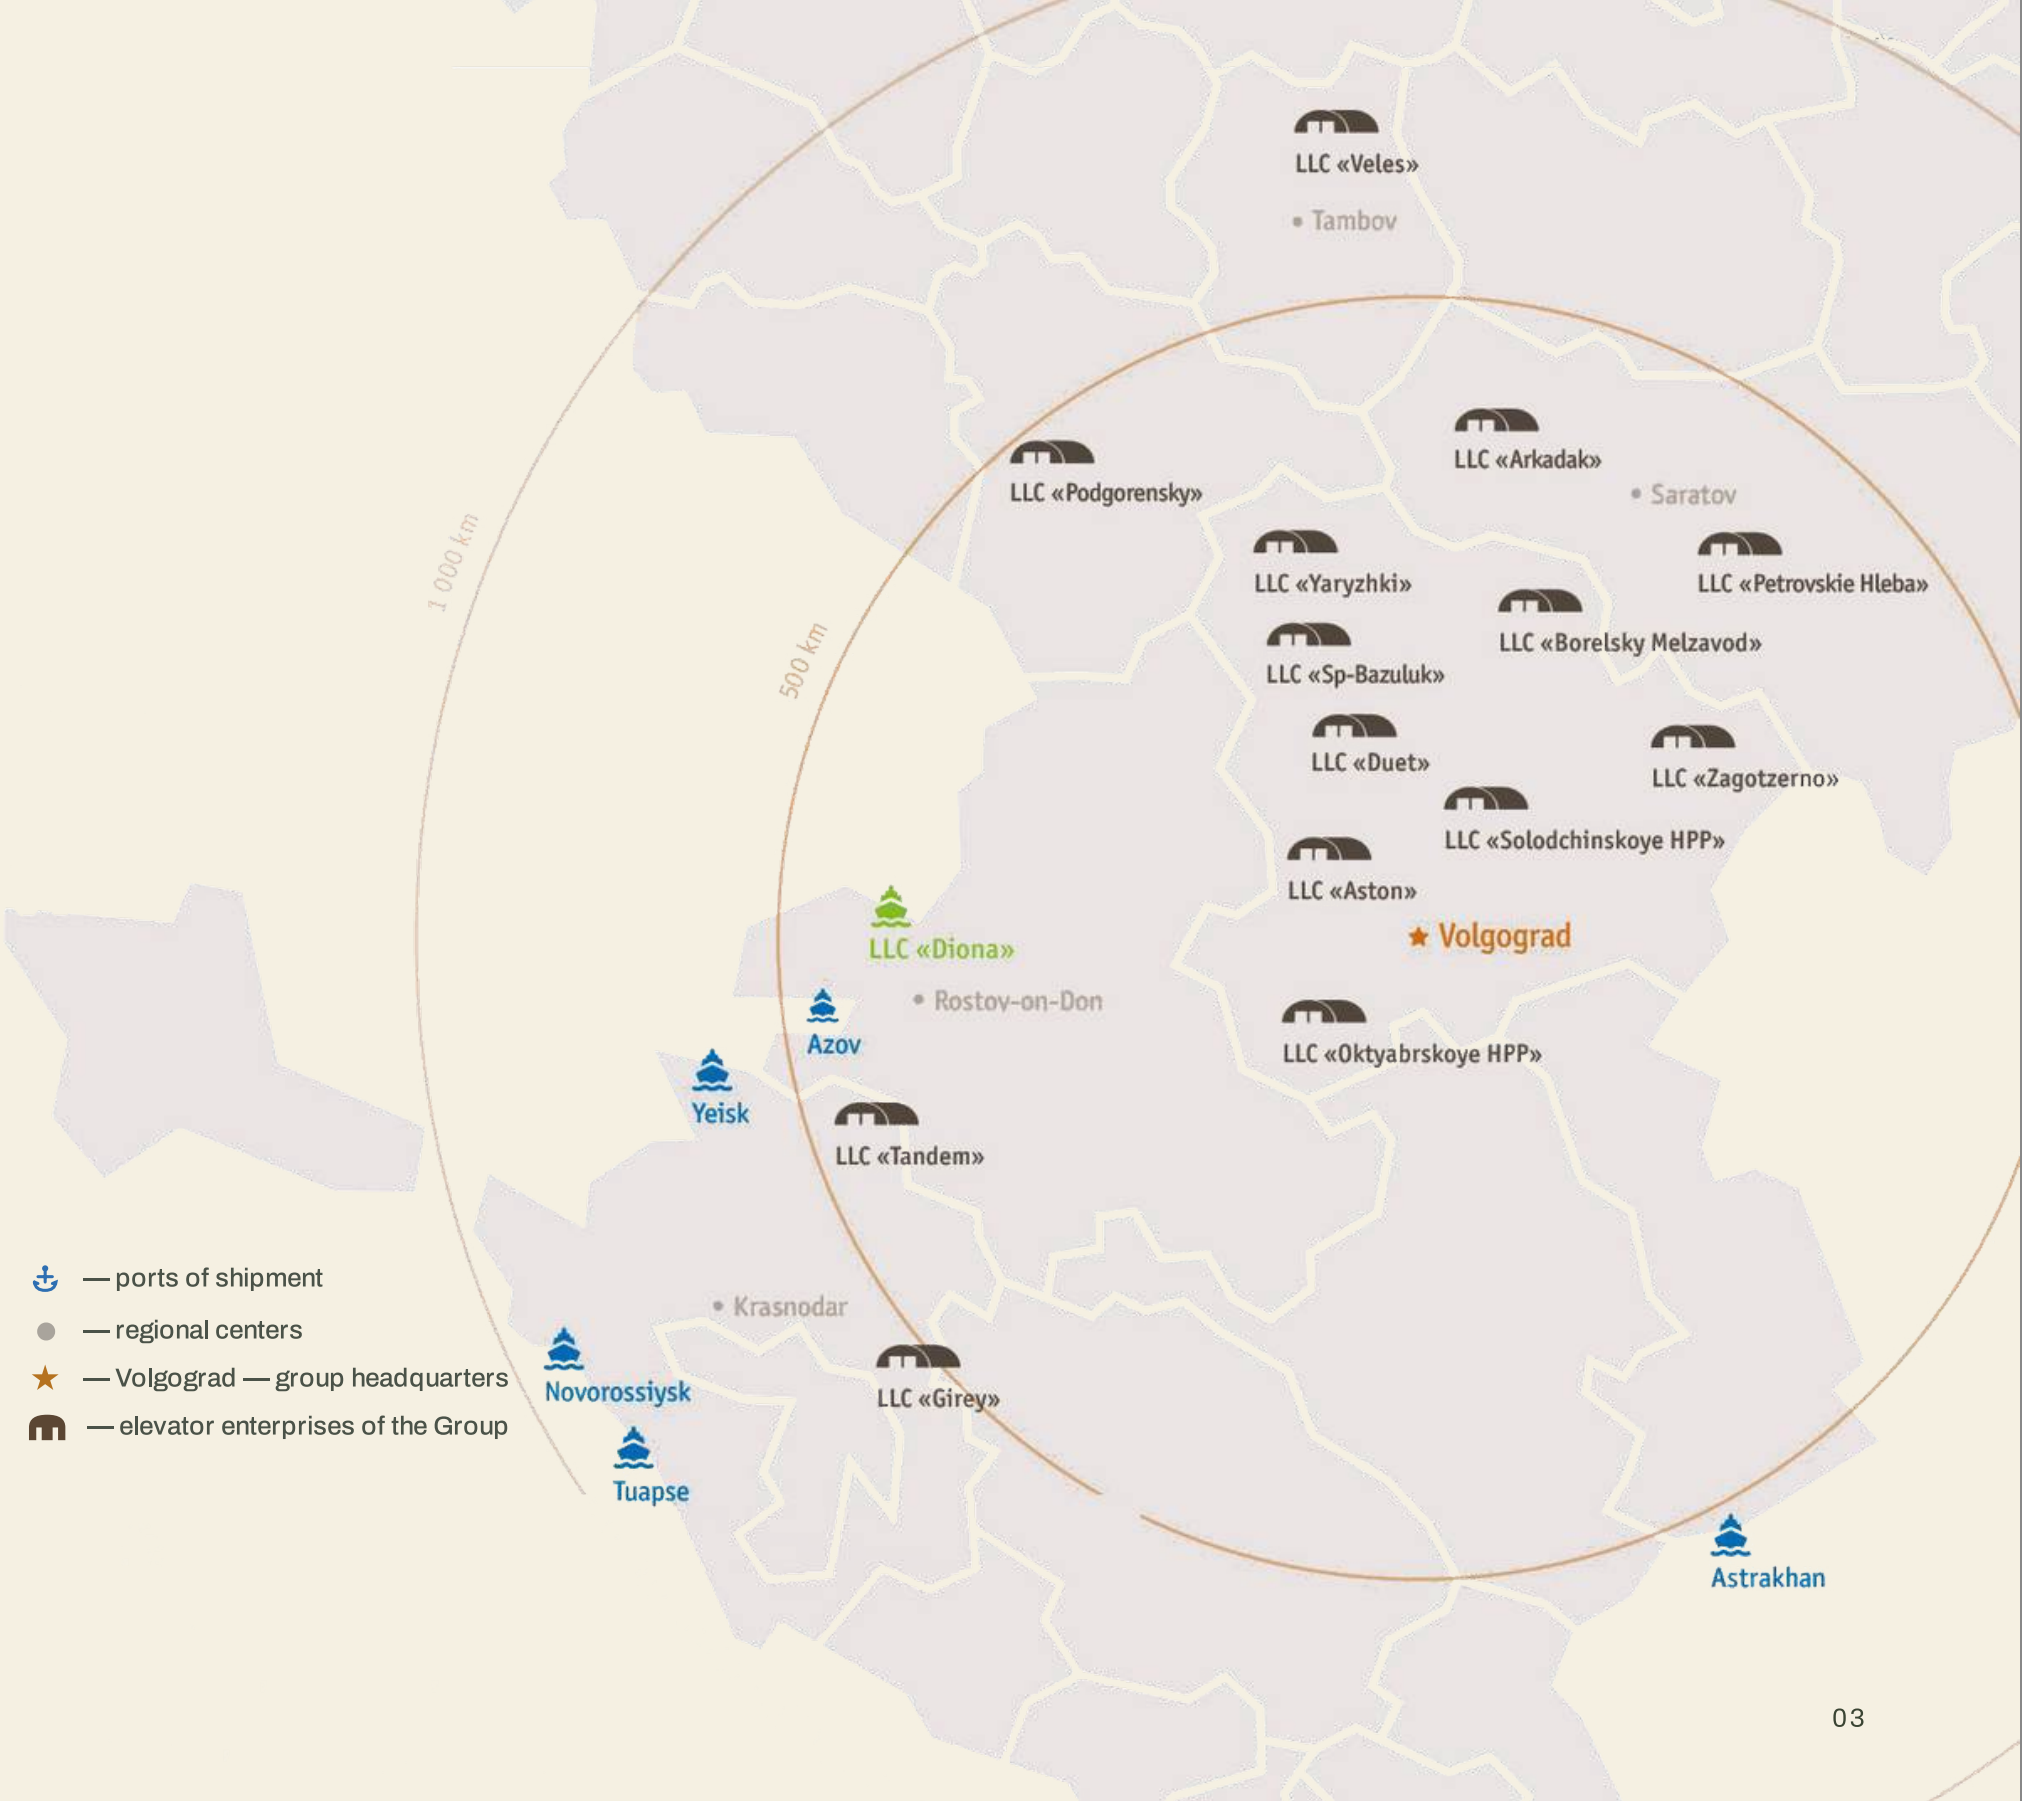

line elevators plus a port elevator in Rostov-on-Don

GEOGRAPHY OF OPERATIONS

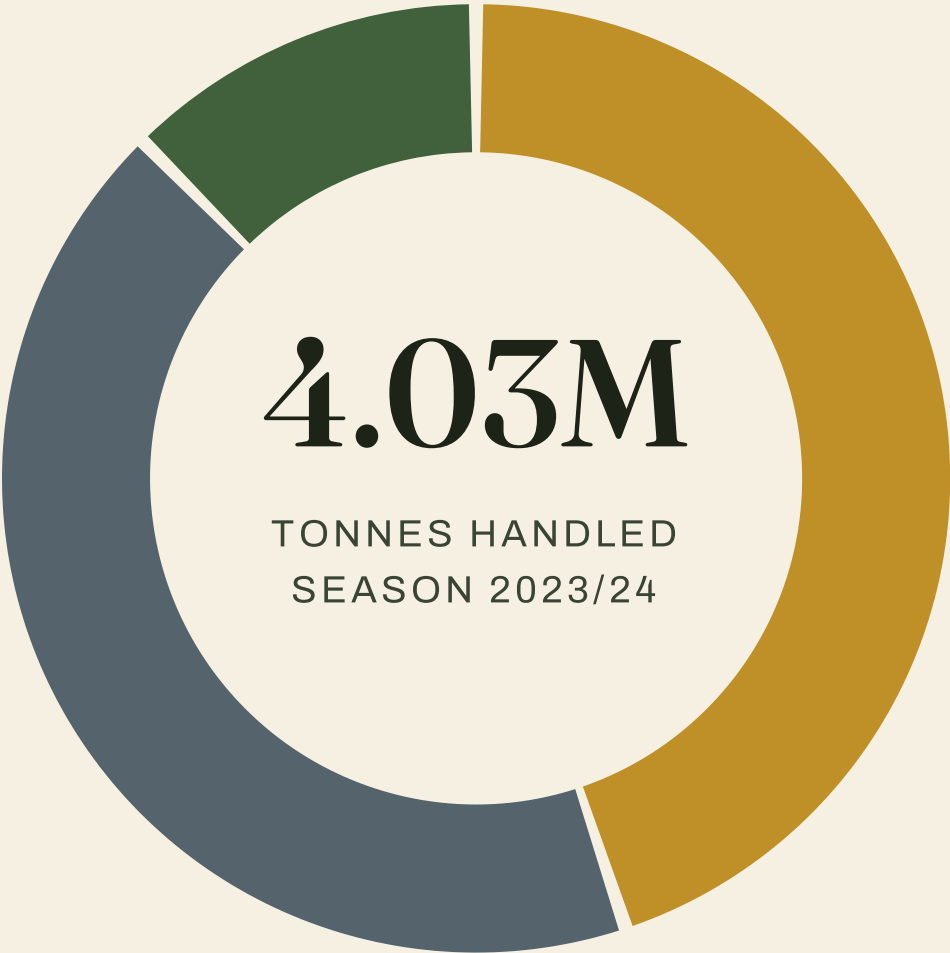

From the Volga heartland to the Azov–Black Sea ports

The elevator network is clustered around the group's home base in Volgograd, with most facilities within a 500 km radius — a short rail leg to the export terminals of the Azov–Black Sea basin.

6 regions host the elevator network	5 export ports of shipment served
500 km radius around Volgograd covers most facilities	1 own port elevator — Diona, Rostov-on-Don

Over 4 million tonnes handled, nearly 90% bound for export channels

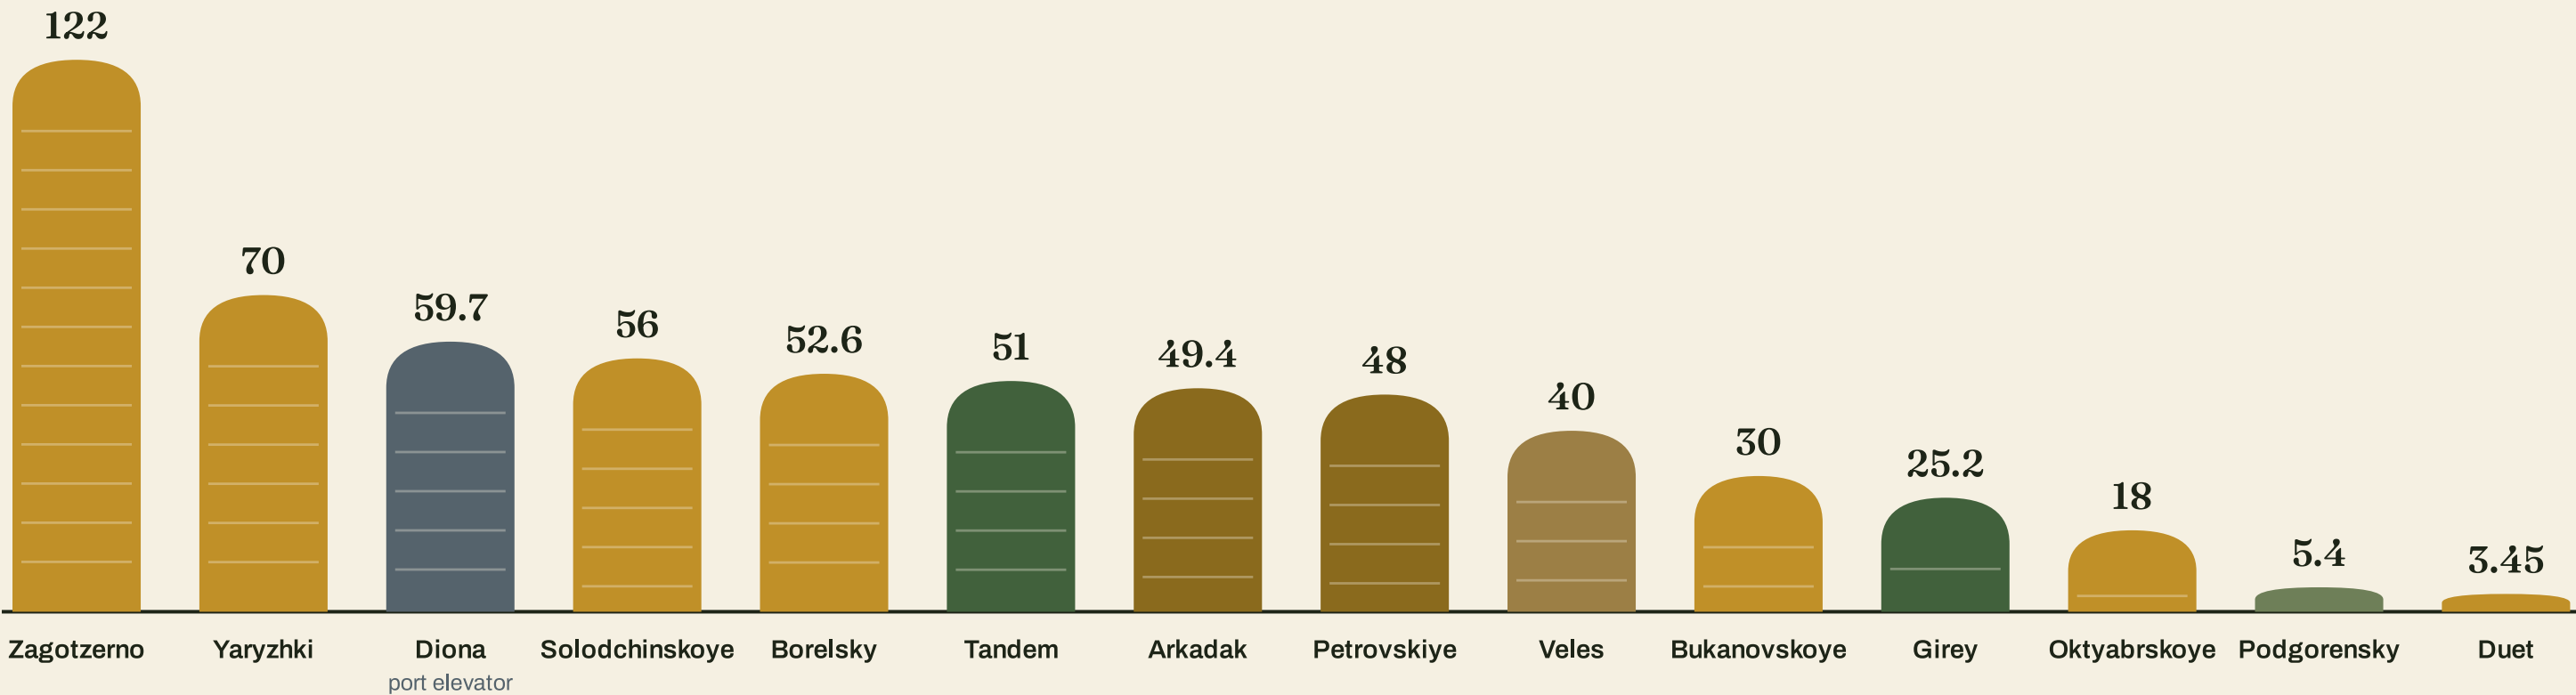

Direct export Shipped to 35+ destination countries — the 7th-largest grain export volume from Russia.	1.81M t · 45%
Azov-Black Sea port terminals Deliveries to RF port terminals for onward sale to export companies.	1.72M t · 43%
Domestic market Flour mills, feed mills and oilseed crushing plants across Russia.	0.50M t · 12%

No. 7 grain exporter from Russia by volume, 2023/24	35+ destination countries for direct export
---	---

658,750 tonnes of storage across six regions

ONE-TIME STORAGE CAPACITY, THOUSAND TONNES

● Volgograd ● Saratov ● Krasnodar ● Rostov-on-Don ● Tambov ● Voronezh

9 of 14 facilities are modern, highly automated complexes commissioned in 2015–2023.

Solodchinskoye HPP: includes 28,000 t at 80% construction readiness.

Capacity stated in tonnes of wheat, as of 23 Nov 2025.

Rail-connected network built for throughput
